

Healthy Hot Tub

Using essential oils instead of chemicals

1. Clean out empty hot tub with *Thieves* cleaner.
2. Start with new filters
3. Fill tub with water, 3 capfuls of *Thieves* cleaner (will foam some at first), 20 drops of geranium, and use lemon to make sure the pH level is normal. Run jets for 30 minutes, adjust lemon as needed.
4. Then we add 10 drops of *Thieves* oil, 10 drops of geranium and run for 10 minutes.
5. Good to go.
6. Every time you get in use 12 drops of *Thieves* oil and 10 drops of geranium, and 3 drops of lemon run jets for 10 minutes and good to go.
7. Every week of non-use repeat step 6.
8. Water will stay clear, clean and smells good for many months, we clean tub 3 times a year
